Cambodia Road Traffic Accident and Victim Information System Monthly Report – December 2006

I. Introduction

The **objective** of the Road Traffic Accident and Victim Information System (RTAVIS) is to provide government and development stakeholders in Cambodia with accurate, continuous and comprehensive information on **road traffic accidents and victims**.

It should allow them to better understand the current road safety situation, plan appropriate responses and evaluate impact of current and future initiatives.

The system is being developed by the Ministry of Public Works and Transport, the Ministry of Interior and the Ministry of Health, with the support of Handicap International.

In Siem Reap, Oddar Mean Chey and Kampong Cham provinces, the system is also supported by the Belgian Technical Cooperation.

The system is run based on data collection forms filled in by trained staff at **major hospitals, private clinics and traffic police**.

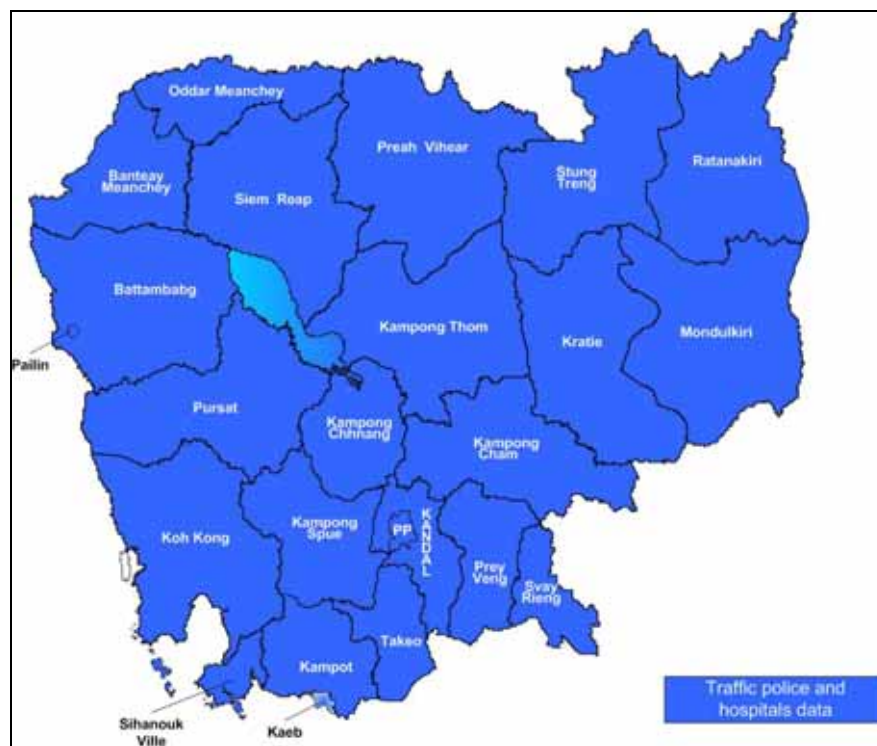

RTAVIS reports are **distributed monthly**. RTAVIS reports can also be found on the following website: www.cnctp.info

Notice:

This monthly report is a snapshot of the situation at a particular time of the year. More analysis is provided in the annual report. The annual report 2005 has been released in June 2006. Annual report 2006 will be released in April 2007.

II. System Coverage

RTAVIS covers the whole country, with health facility and traffic police data, as illustrated on the map here below:

Cambodia Road Traffic Accident and Victim Information System Monthly Report – December 2006

III. System Update

Introduction of GPS

From July 2006, Global Position System (GPS) devices have been introduced to the traffic police in Russei Keo District in Phnom Penh. The GPS coordinates allow us now to exactly locate accidents, using GIS data. GPS devices will from now be progressively introduced to other districts of Phnom Penh and provinces crossed by major national roads. On the medium term, this will enable RTAVIS to identify blackspots of the Cambodian Road System.

The following chart shows the locations of road traffic accidents in Russei Keo district from July to December.

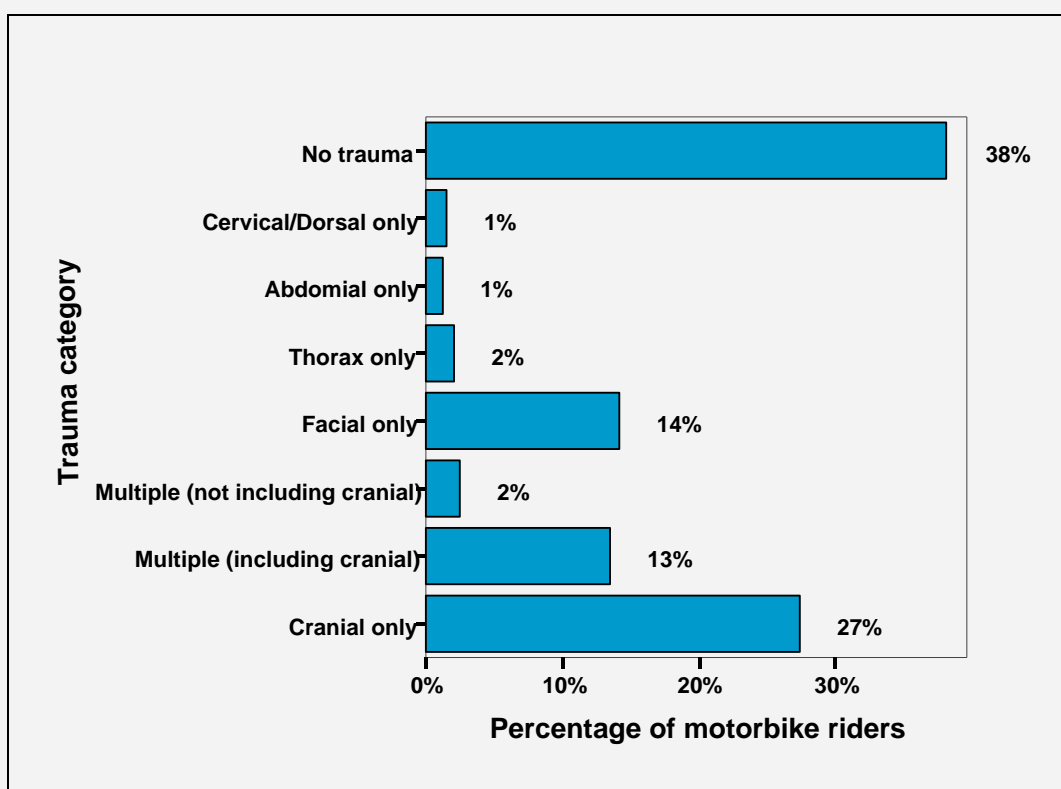

Cambodia Road Traffic Accident and Victim Information System Monthly Report – December 2006

IV. Executive Summary

Key findings for the month of **December 2006** are the following:

- A provisional number of **2,064 casualties** were reported by the participating hospitals, health centres, private clinics and traffic police departments in the 24 reporting provinces. Among them, **462 were severely injured and 98 died**.
- **In Phnom Penh, 440 casualties** were reported, corresponding to a **23% decrease compared to previous month** (November figures were higher due to the Water Festival).
- **77%** of casualties injured in accidents occurring on straight roads.
- **53%** of casualties injured in accidents occurring on national roads.
- **43%** of casualties injured in accidents occurring on urban area.
- **10%** of casualties injured in accidents occurring on curve roads.
- **40%** of motorbike rider suffered from head injuries, as shown in graph below:
