Cambodia Road Traffic Accident and Victim Information System Monthly Report – March 2007

I. Introduction

The **objective** of the Road Traffic Accident and Victim Information System (RTAVIS) is to provide government and development stakeholders in Cambodia with accurate, continuous and comprehensive information on **road traffic accidents and victims**.

It should allow them to better understand the current road safety situation, plan appropriate responses and evaluate impact of current and future initiatives.

The system is being developed by the Ministry of Public Works and Transport, the Ministry of Interior and the Ministry of Health, with the support of Handicap International.

In Siem Reap, Oddar Mean Chey and Kampong Cham provinces, the system is also supported by the Belgian Technical Cooperation.

The system is run based on data collection forms filled in by trained staff at **major hospitals, private clinics and traffic police**.

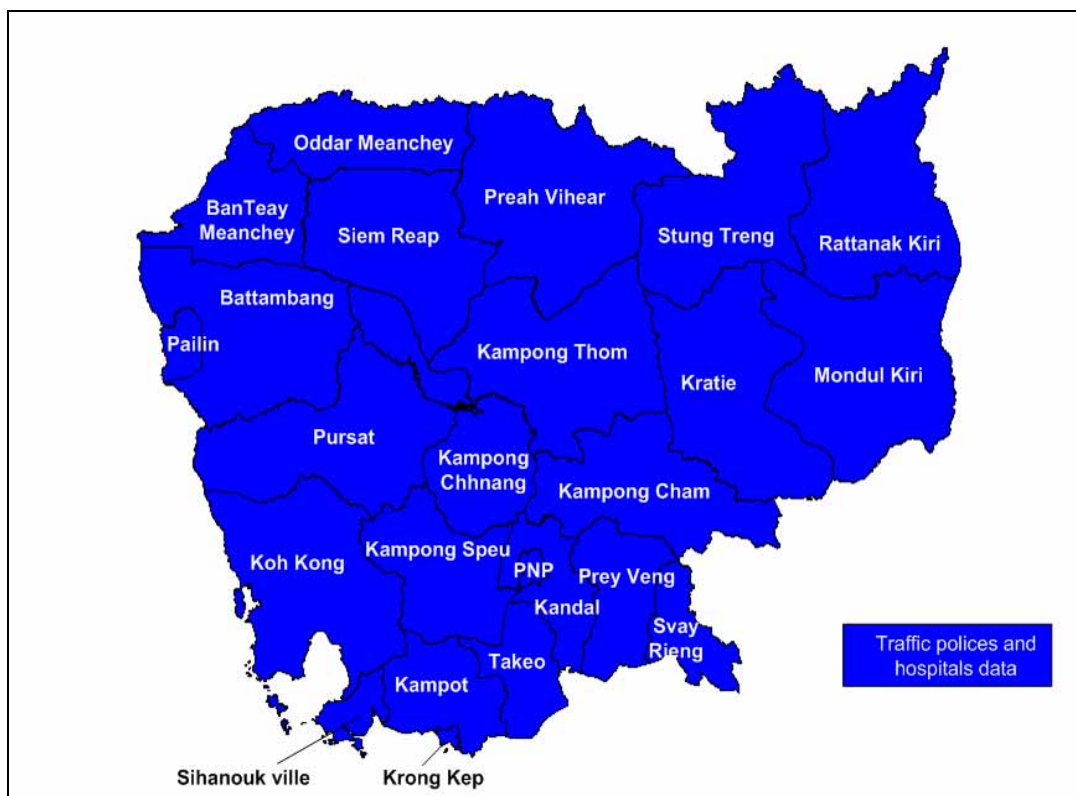

RTAVIS reports are **distributed monthly**. RTAVIS reports can also be found on the following website: www.cnctp.info

Notice:

This monthly report is a snapshot of the situation at a particular time of the year. More analysis is provided in the annual report. The annual report 2005 has been released in June 2006. Annual report 2006 will be released soon.

II. System Coverage

RTAVIS covers the whole country, with health facility and traffic police data, as illustrated on the map here below:

Cambodia Road Traffic Accident and Victim Information System Monthly Report – March 2007

III. System Update

Introduction of GPS

From July 2006, Global Position System (GPS) devices have been introduced to the traffic police in Russei Keo District in Phnom Penh. The GPS coordinates allow us now to exactly locate accidents, using GIS data. GPS devices will from now be progressively introduced to other districts of Phnom Penh and provinces crossed by major national roads. On the medium term, this will enable RTAVIS to identify blackspots of the Cambodian Road System.

The following chart shows the locations of road traffic accidents in Russei Keo district from July 2006 to March 2007.

IV. Executive Summary

Key findings for the month of **March 2007** are the following:

- A provisional number of **2,251 casualties** were reported by the participating hospitals, health centres, private clinics and traffic police departments in the 24 reporting provinces. Among them, **584 were severely injured and 97 died**.
- **In Phnom Penh, 425 casualties** were reported, corresponding to an **8% decrease compared to previous month**.
- **24% of fatalities aged between 20-24 years old**, followed by 25-29 years old (15%) and more than 54 years old (14%);
- **37% of fatalities were farmers**, while they presented only 28% among total casualties;
- In average, **4 people injured per accident**;
- **27% of casualties were transferred to hospital by ambulance**;
- **The highest peak of accident time of casualties is 10am to 11am**. It is due to an accident occurred in Kampong Cham province, which involved more than 30 casualties.
