Cambodia Road Traffic Accident and Victim Information System Monthly Report – February 2007

I. Introduction

The **objective** of the Road Traffic Accident and Victim Information System (RTAVIS) is to provide government and development stakeholders in Cambodia with accurate, continuous and comprehensive information on **road traffic accidents and victims**.

It should allow them to better understand the current road safety situation, plan appropriate responses and evaluate impact of current and future initiatives.

The system is being developed by the Ministry of Public Works and Transport, the Ministry of Interior and the Ministry of Health, with the support of Handicap International.

In Siem Reap, Otdar Mean Chey and Kampong Cham provinces, the system is also supported by the Belgian Technical Cooperation.

The system is run based on data collection forms filled in by trained staff at **major hospitals, private clinics and traffic police**.

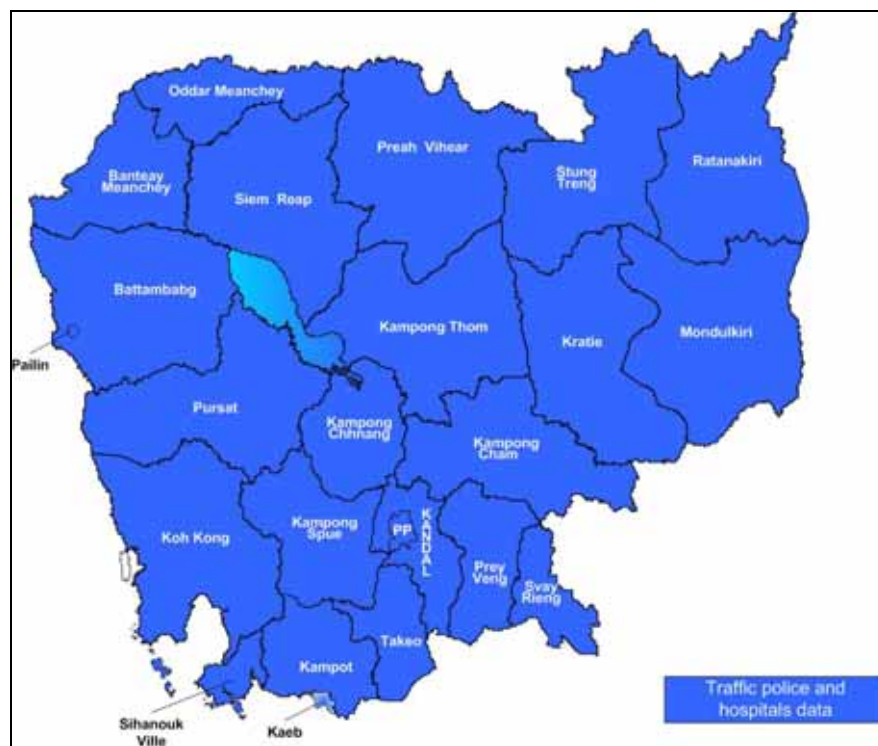

RTAVIS reports are **distributed monthly**. RTAVIS reports can also be found on the following website: www.cnctp.info

Notice:

This monthly report is a snapshot of the situation at a particular time of the year. More analysis is provided in the annual report. The annual report 2005 has been released in June 2006. Annual report 2006 will be released in April 2007.

II. System Coverage

RTAVIS covers the whole country, with health facility and traffic police data, as illustrated on the map here below:

Cambodia Road Traffic Accident and Victim Information System Monthly Report – February 2007

III. System Update

Introduction of GPS

From July 2006, Global Position System (GPS) devices have been introduced to the traffic police in Russei Keo District in Phnom Penh. The GPS coordinates allow us now to exactly locate accidents, using GIS data. GPS devices will from now be progressively introduced to other districts of Phnom Penh and provinces crossed by major national roads.

On the medium term, this will enable RTAVIS to identify blackspots of the Cambodian Road System.

The following chart shows the locations of road traffic accidents in Russei Keo district from July 2006 to February 2007.

IV. Executive Summary

Key findings for the month of **February 2007** are the following:

- A provisional number of **2,248 casualties** were reported by the participating hospitals, health centres, private clinics and traffic police departments in the 24 reporting provinces. Among them, **583 were severely injured and 117 died**.
- **In Phnom Penh, 459** casualties were reported, corresponding to a **13% decrease compared to previous month**.
- **73%** of casualties were motorbike riders, **followed by** 8% of car riders (private and taxis) and 7% of pedestrians.
- **2%** of motorbikes' casualties were wearing a helmet.
- **39%** of casualties were suffering from head injuries.
- **26%** of casualties were severely injured (requiring chirurgical intervention of ICU).
- **The active part of the population** remained the most affective by road traffic accident:
 - **25%** of casualties were students.
 - **25%** of casualties were farmers.
 - **19%** of casualties were workers.
- **Non appropriated speed** is responsible for **54%** of casualties, **followed by alcohol** (18% of casualties) and **dangerous overtaking** (7% of casualties).
