# Cambodia Road Traffic Accident and Victim Information System Monthly Report – April 2007

## I. Introduction

The **objective** of the Road Traffic Accident and Victim Information System (RTAVIS) is to provide government and development stakeholders in Cambodia with accurate, continuous and comprehensive information on **road traffic accidents and victims**.

It should allow them to better understand the current road safety situation, plan appropriate responses and evaluate impact of current and future initiatives.

The system is being developed by the Ministry of Public Works and Transport, the Ministry of Interior and the Ministry of Health, with the support of Handicap International.

In Siem Reap, Oddar Mean Chey and Kampong Cham provinces, the system is also supported by the Belgian Technical Cooperation.

The system is run based on data collection forms filled in by trained staff at **major hospitals, private clinics and traffic police**.

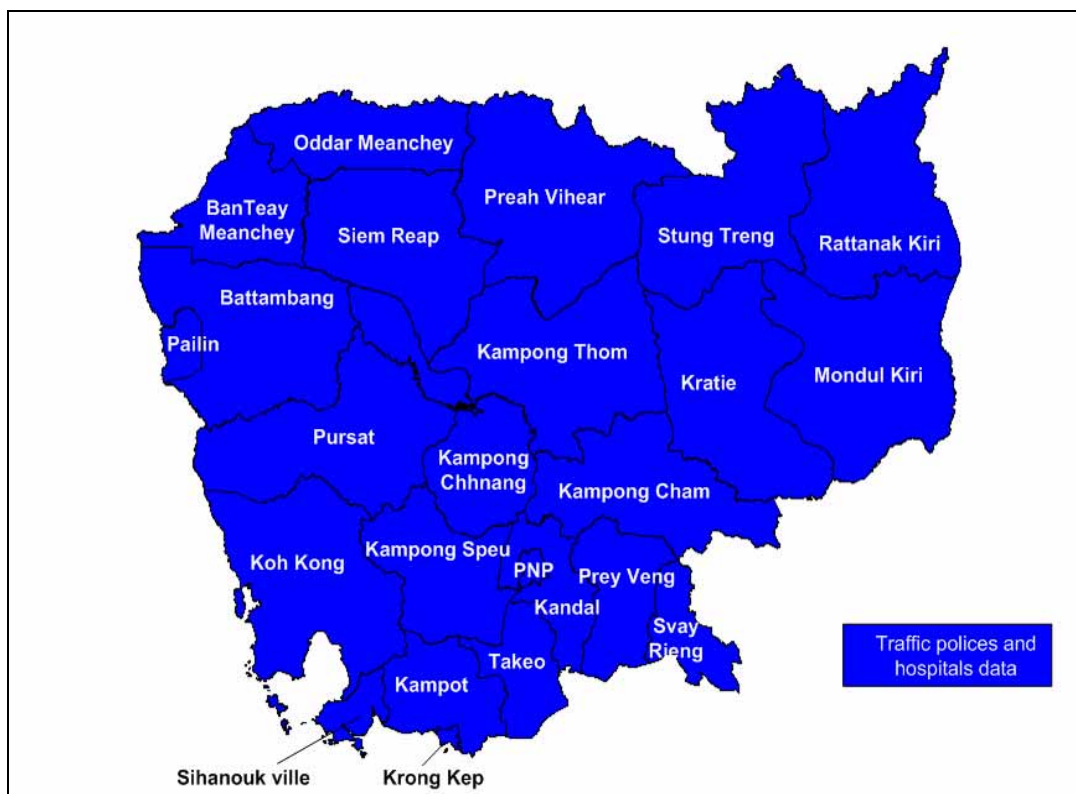

RTAVIS reports are **distributed monthly**. RTAVIS reports can also be found on the following website: [www.cnctp.info](http://www.cnctp.info)

### **Notice:**

This monthly report is a snapshot of the situation at a particular time of the year. More analysis is provided in the annual report. The annual report 2005 has been released in June 2006. Annual report 2006 will be released soon.

## II. System Coverage

RTAVIS covers the whole country, with health facility and traffic police data, as illustrated on the map here below:

## III. System Update

---

### Introduction of GPS

From July 2006, Global Position System (GPS) devices have been introduced to the traffic police in Russei Keo District in Phnom Penh. The GPS coordinates allow us now to exactly locate accidents, using GIS data. GPS devices will from now be progressively introduced to other districts of Phnom Penh and provinces crossed by major national roads. On the medium term, this will enable RTAVIS to identify blackspots of the Cambodian Road System.

The following chart shows the locations of road traffic accidents in Russei Keo district from July 2006 to April 2007.

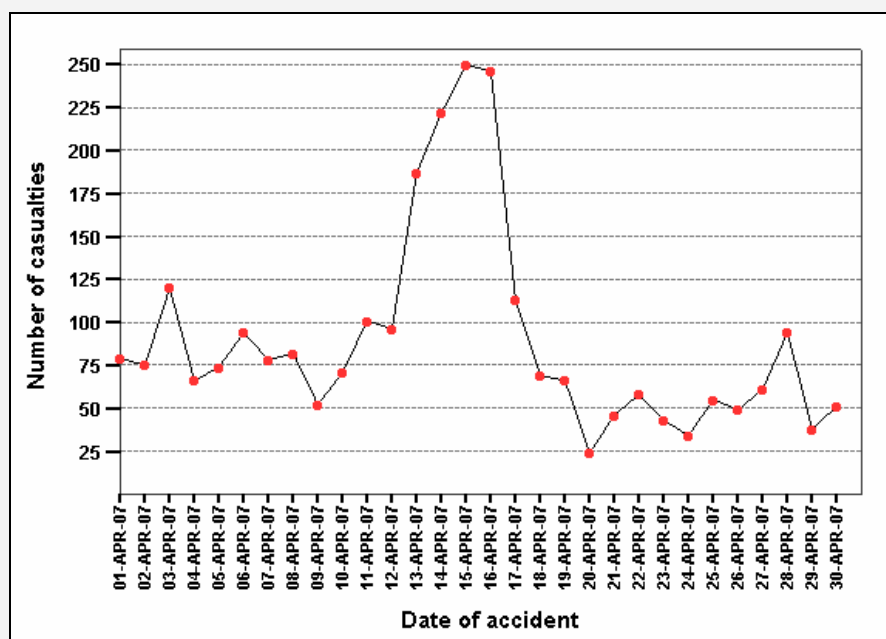

## Cambodia Road Traffic Accident and Victim Information System Monthly Report – April 2007

### IV. Executive Summary

Key findings for the month of **April 2007** are the following:

- A provisional number of **2,694 casualties** were reported by the participating hospitals, health centres, private clinics and traffic police departments in the 24 reporting provinces. Among them, **697 were severely injured and 146 died**.
- **In Phnom Penh, 335 casualties** were reported, corresponding to a **22% decrease compared to April 2006**.
- The number of **fatalities has decrease by 12%** compared to April 2006.
- **42%** of casualties aged between 15 and 24 years old. They represented **39% of fatalities**.
- **Farmers represented the highest percentage of casualties (30%)**, followed by workers (21%) and students (20%) while **workers represented the highest percentage of fatalities (31%)**, followed by farmers (29%) and students (13%).
- **27%** of casualties were transferred to hospital by ambulance;
- The average daily number of casualties **has nearly tripled during the Khmer New Year period** (14<sup>th</sup>, 15<sup>th</sup> and 16<sup>th</sup> of April) with a peak the 15<sup>th</sup> of April recording 250 casualties.
  - This increase was however **not observed in Phnom Penh**, where the number of casualties remained stabled during Khmer New Year<sup>1</sup>.
  - This increase was particularly sharp in Kampong Cham province.
  - This increase was observed particularly among **young people aged between 20 to 24 years old** (they represented 31% of the casualties, compared to 24% during normal days).
  - This corresponds to **more than 12 fatalities per day**, compared to **more than 4 fatalities during normal day**.

<sup>1</sup> The total number of casualties in Phnom Penh in April 2007 is even lower than the number of casualties during the previous month (March 2007).
