## I. Introduction

RTAVIS reports are **distributed monthly**. RTAVIS reports can also be found on the following website:  
[www.cnctc.info](http://www.cnctc.info)

This monthly report is a snapshot of the situation at a particular time of the year. More analysis is provided in the annual report. The annual report 2005 has been released in June. Annual report 2006 will be released in April 2007.

RTAVIS covers the whole country, with health facility and traffic police data, as illustrated on the map here below:

## III. System Update

---

### Introduction of GPS

From July 2006, Geographic Position System (GPS) devices have been introduced to the traffic police in Russei Keo District in Phnom Penh. The GPS coordinates allow us now to exactly locate accidents, using GIS data. GPS devices will from now be progressively introduced to other districts of Phnom Penh and provinces crossed by major national roads.

On the medium term, this will enable RTAVIS to identify blackspots of the Cambodian Road System.

The following chart shows the locations of road traffic accidents in Russei Keo district from July to September.

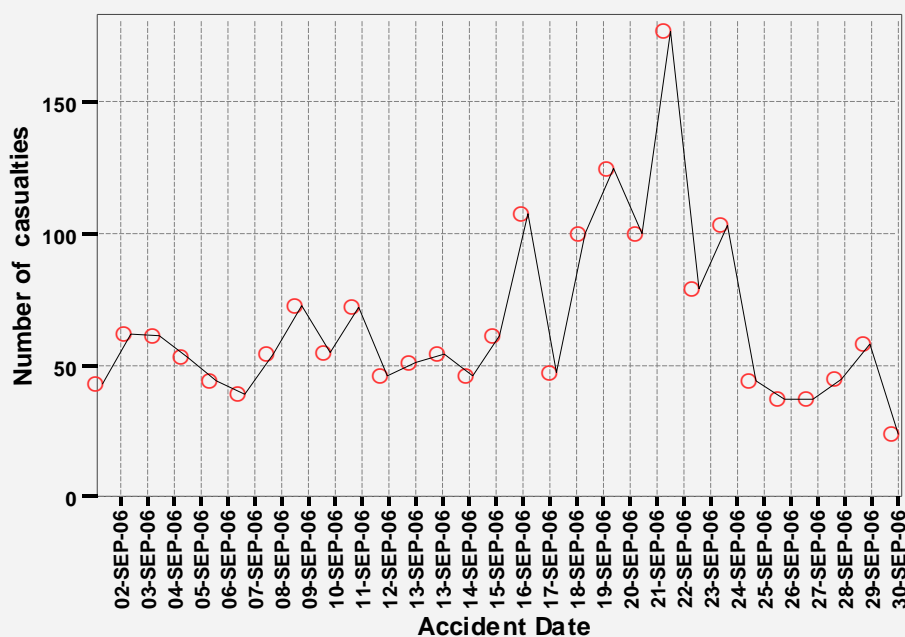

## Cambodia Road Traffic Accident and Victim Information System Monthly Report – September 2006

### IV. Executive Summary

Key findings for the month of **September 2006** are the following:

- A provisional number of **1,955 casualties** were reported by the participating hospitals, health centres, private clinics and traffic police departments in the 24 reporting provinces. Among them, **253 were severely injured and 84 died**.
- **In Phnom Penh, 348 casualties** were reported, corresponding to a **31% decrease compared to September 2005**.
- **33%** of casualties suffered from head injuries.
- **49%** of four-wheeled vehicles involved in road traffic accidents were right-hand drives.
- **5%** of motorbikes' casualties were wearing a helmet.
- **Higher daily numbers of casualties have been reported during the Pchum Ben period (21<sup>st</sup>, 22<sup>nd</sup> and 23<sup>rd</sup> of September), with a peak the 22<sup>nd</sup> of September, recording 3 times more casualties than the daily average of the month.**
